Dear Valued Customer,

This notice is to inform you that CareFusion will no longer manufacture the LTV 800[®], LTV 900[®] and LTV 950[®] ventilators. Originally released over ten years ago, these ventilators will be discontinued at the end of this year and will be placed on our listing of obsolete products. Obsolescence is due to the age of the instrument and the date of last manufacture and, therefore contributes to the scarcity of operating supplies, service parts and major sub-assemblies for these specific models only.

Model Inst	Released	End of Production	End of Support	Replacement Vent
LTV 800	07/01/01	10/31/11	10/31/16	LTV 1100
LTV 900	04/01/99	10/31/11	10/31/16	LTV 1100
LTV 950	09/01/99	12/31/11	12/31/16	LTV 1150

CareFusion will continue to provide service support, spare parts and accessories for these ventilators for a minimum of five years from the last date of manufacture and for as long as supplies are available thereafter.

The LTV[®] 1150 ventilator allows highly customizable settings for increased patient success through periods of stability or acceleration of their respiratory conditions. Breath types include: Volume and Pressure Control, Pressure Support and Spontaneous. Ventilation modes include: Control, Assist/Control, SIMV, CPAP, and Non-Invasive. In addition, the internal PEEP and SBT offer extended value. With over 50,000 LTV ventilators installed throughout the world, the LTV technology and reliability in patient care is established and growing.

The LTV 1100 ventilator offers both invasive and noninvasive modes of ventilation in Pressure Support, Volume Control and Spontaneous breath types, delivered with flow triggering. An O₂ source can be used to bleed in oxygen. The addition of SIMV/CPAP and Apnea Backup combine to create powerful portable ventilation technology.

Please contact your local CareFusion sales representative for additional information. We will be glad to quote specific prices and answer any questions you may have.

Thank you for your continued support of CareFusion Alternate Care products.

Sincerely,

Gene Turner
